**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 20, drawn to a method/apparatus for determining if a differential signal is consistent with / represents a valid word, classified in class 375, subclass 227.
- II. Claims 21 – 23, drawn to an apparatus for compensating for cross-connection, classified in class 375, subclass 220.

The inventions are distinct, each from the other because of the following reasons: claims 1 – 20 (group I) are drawn to a method/apparatus of determining if a differential signal is consistent with / represents a valid word; whereas, claims 21 – 23 (group II) are drawn to an apparatus for compensating for cross-connection.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the arts as shown by their different classifications, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for group I is not required for group II, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least on claim

Art Unit: 2611

reaming in the application. Any amendment of the inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.117(i).
